Architectural Castle Creek Estate

Property Description

This wonderful five-bedroom five-bathroom estate designed by world-renowned architect Hugh Newell Jacobsen picture frames the panoramic mountain views. Only minutes up Castle Creek this estate is on a very private 14 acres. The home features high design decor, yet very comfortable and filled with interesting and fun contemporary art. The home is 9,663 square feet of architectural living spaces and sleeps 12 people comfortably. The living room has floor to ceiling windows with a stone fireplace and is connected to a large dining room that can expand into seating 16 for dinner. The fully equipped chef's kitchen has a work area, pantry and in-kitchen family dining area. The main floor living includes a spacious working office with fireplace. The master bedroom and bathroom with soaking tub and steam shower and incredible views. There a secondary master on this level. The garden level has a theater, exercise studio and three additional bedrooms. The home has extraordinary outdoor spaces for just relaxing in front of the fire pit or dining alfresco. There is a two-car garage.
